PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience developing, testing, and supporting software applications and networking systems. Experienced with Python, Java, SQL, debugging, software validation, and system support. Strong analytical and communication skills with experience collaborating under senior engineering leadership to deliver projects within quality and schedule requirements.

EDUCATION

University of Kentucky

Lexington, KY

B.S. Computer Science

Graduated May 2023

TECHNICAL SKILLS

Languages: Python, Java, SQL, C++

Software Engineering: Debugging, Software Testing, Application Development, Validation

Systems: Windows, Linux, Networking Fundamentals

Tools: Git, Docker, REST APIs, VS Code

PROFESSIONAL EXPERIENCE

Junior Software Engineer — BlueRiver Technologies

Louisville, KY | June 2023 – Present

- Designed, modified, and implemented internal software applications used by engineering teams.
- Supported software applications, operating systems, and networking equipment across technical projects.
- Participated in software testing, debugging, validation, and issue analysis to ensure specification compliance.
- Collaborated with senior engineers to meet quality standards, schedules, and technical requirements.
- Assisted with software deployment and site commissioning activities.

PROJECTS

- Built a Python-based network monitoring dashboard using REST APIs and SQL for system performance tracking.
- Developed software logging utilities to monitor application errors and improve troubleshooting efficiency.

CERTIFICATIONS

CompTIA Network+ • AWS Certified Cloud Practitioner
