marcus.vance@email.com | (555) 034-7890 | Boston, MA | linkedin.com/in/mvance-backend

EDUCATION

Boston University

B.S. in Computer Engineering

Boston, MA

Graduation: May 2025

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, Bash scripting, Java
Frameworks: FastAPI, Django, Flask, SQLAlchemy
Databases: PostgreSQL, SQLite, Redis
Infrastructure: Linux Systems, Git, Docker, Kubernetes, Ansible, AWS Core

PROFESSIONAL EXPERIENCE

Backend Engineer Graduate Trainee

CoreMatrix Infrastructure Group

September 2025 – Present

Boston, MA

- Maintained enterprise internal network telemetry logging microservices built using **Python and FastAPI**.
- Optimized database connection pool sizes within a large **PostgreSQL** instance cluster, improving raw write latency by 14%.
- Wrote comprehensive automation scripts in Python and Bash to automatically handle configuration rollbacks on server faults.
- Constructed isolated test suites tracking API stability and performance testing routines under extreme parallel execution spikes.

TECHNICAL PROJECTS

Distributed File Storage Synchronizer

Academic Capstone Project

January 2025 – May 2025

- Designed a peer-to-peer metadata tracker coordinating large file chunk replication mechanics across physical server racks.
- Eliminated deadlocking criteria by drafting localized structural synchronization mutexes within low-level custom multi-threaded C modules.
- Implemented basic SQL database transaction tracking protocols logging transaction health and metadata history reports.

System Health CLI Monitor

Open Source Contributor

October 2024

- Engineered a custom text-based terminal dashboard tracking disk-write exhaustion and RAM allocations dynamically.
- Polished robust parsing features reading unstructured system text traces cleanly without stalling foreground processing threads.
