

Jordan K. Taylor

jordan.t@email.com | (555) 023-4567 | Brooklyn, NY | github.com/jtaylor-dev

EDUCATION

New York University

B.S. in Computer Science; Minor in Mathematics

New York, NY

Graduation: January 2026

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java, HTML/CSS
Frameworks: React, Node.js, Express, Next.js, NestJS, Django, TailwindCSS
Databases: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM
DevOps/Tools: Git, Docker, AWS (S3/EC2), Jest, CI/CD, RESTful APIs, GraphQL

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer Intern

June 2025 – August 2025

Vanguard FinTech Systems

New York, NY

- Developed features for a high-traffic asset trading UI dashboard using **React and TypeScript**, maximizing render speeds.
- Built scalable backend restful routing structures using Node.js and Express with comprehensive unit testing coverage.
- Optimized complex data lookups by refactoring legacy analytical PostgreSQL database schemas and indexing structures.
- Collaborated closely within an Agile workflow pattern executing weekly stand-ups, code sprints, and deployment pipelines.

TECHNICAL PROJECTS

Collaborative Task Management Platform

September 2025 – December 2025

Lead Backend Architect

- Engineered a real-time collaborative platform hosting multi-user workflow tracking with instantaneous synchronization.
- Utilized **Python** for specialized reporting scripts and background worker tasks handling automated email digests.
- Leveraged structured WebSockets connections alongside Redis caching to maintain live states under heavy synthetic load.
- Implemented strict JWT auth flows alongside role-based permission gateways securing sensitive administrative endpoints.

Dynamic Content API Gateway

March 2025 – May 2025

Personal Project

- Built an open-source high-throughput Markdown parser API rendering highly performant documentation assets dynamically.
- Established localized deployment containers utilizing Docker, easing configuration protocols across independent nodes.
